ERG continues to consolidate its presence in France

Start-up of the 32 MW Moulins du Bois wind farm

Genoa, 20 August 2024 – ERG has completed the construction and initiated the energisation of the greenfield wind farm at Moulins du Bois, in the Bourgogne-Franche-Comté region.

The wind farm consists of nine Vestas V117 turbines, each with a capacity of 3.6 MW, for a total installed capacity of 32,4 MW. With an estimated annual production of around 70 GWh, is equivalent to the energy needs of approximately 11,000 households and benefits from a tariff regime with a 20-year CfD.

Paolo Merli, Chief Executive Officer of ERG, commented: *“We are very satisfied to have recently started up two wind farms in France, both resulting from organic development in line with what is outlined in our Industrial Plan. A significant step forward for ERG, which consolidates its presence in the country, the Group's second reference market with a total installed capacity of over 700 MW”.*
