Sweden: Furuby 62 MW wind farm has been started up

Genoa, 25 November 2022 – ERG has completed and started up the Furuby wind farm (62 MW), in Southern Sweden.

The project will consist of 10 Siemens Gamesa 6.2 MW latest-generation turbines, the annual output of which is estimated at around 210 GWh, corresponding to almost 3,400 equivalent hours per year and about 140 kt of avoided CO2 emissions each year.

Paolo Merli, CEO ERG, commented: *“The start-up of the Furuby wind farm, earlier than announced in the Business Plan represents a further progress in our growth and geographical diversification process, through a state-of-the-art plant in Sweden, one of the most virtuous countries in the path to decarbonisation.”*
