

Press release

ERG on CDP's 'A List'

The top ranking of leading companies in the fight against climate change

Genoa, 13 December 2022 – ERG is now on the 'A List' (previously A-) of CDP (Carbon Disclosure Project), the global non-profit organisation that, by monitoring performance in the fight against climate change, guides companies and governments towards reducing greenhouse gas emissions.

The Group's many best practices, including its governance model for managing climate change, combined with its efforts to reduce greenhouse gas (GHG) emissions by developing renewable energies (wind and solar) led to its inclusion on the 'A list'.

Based on the data reported through CDP's 2022 Climate Change Questionnaire, ERG is among the best companies (283 in the "A list" in 2022) out of over 15,000 rated confirming the Groups' corporate transparency in reporting and targets towards "net-zero".

Paolo Merli, CEO of ERG: "This award confirms ERG's leadership in the fight against climate change, a focus of our corporate strategy for over a decade. This achievement is even more important in a geopolitical and market scenario that, now more than ever, requires joint actions by companies and institutions to achieve climate neutrality."
