

## Press Release

### ERG joins the Nasdaq Sustainable Bond Network

**Genoa, 13 June 2023** - ERG joins the Nasdaq Sustainable Bond Network, a platform dedicated to Sustainable Finance of the New York electronic stock exchange that brings together investors, issuers and investment banks. The platform is configured as a tool through which investors can access, in a centralised and standardised manner, the data relating to the green bond issues of various issuers, facilitated in this way in the generation and comparison of different impact reports conducive to a transparent allocation of their sustainable investments. On the issuer's side, joining will allow the Group to further expand the network of potential international investors attentive to sustainability issues.

To mark the occasion, the ERG logo lit up the Nasdaq Tower in the heart of Manhattan.

The entry into the Sustainable Bond Network is an important recognition of ERG's commitment to sustainable finance, through a financial strategist who supports the Group's development programmes contained in the Business Plan and which aims to ensure that at least 90% of loans in 2026 are classified as "Sustainable Funding".

ERG has issued three green bonds since 2019, for a total of EUR 1.6 billion. As at 31 December 2022, ERG's "sustainable" funding amounted to approximately EUR 1.8 billion, and accounted for 88% of the Group's gross debt.

ERG recently made available to the public the Green Bond Report 2022, relating to the two bond loans issued in September 2020 and September 2021, whose income as at 31 December 2022 was fully allocated.
