

## Press Release

### ERG wins auction for an 18 MW wind farm in France

**Genoa, 14 June 2019** – Parc Eolien du Pays à Part, a French company belonging to the ERG Group, owner of an 18 MW project located in Northern France, in the region of Pas-de-Calais, is among the winners of the third auction dedicated to the on-shore wind power sector, the results of which were announced yesterday by the Ministère de la Transition écologique et solidaire.

The wind farm, whose authorisation process is at an advanced stage, will have an estimated annual output when fully operational of around 44 GWh, equal to approximately 26 kt of avoided CO2 emission per year and corresponding to the needs of about 15,000 households.

Following the outcome of the auction the wind farm will benefit from a contract for difference for a period of 20 years after its coming of stream.

By way of this project, which forms part of the pipeline of approximately 750 MW acquired with Epuron (see PR dated 6/4/18), ERG continues to pursue its industrial strategy of organic growth in one of the most important European countries for wind power development.
